

## Self-Assessment – Site

### **Objective:**

Identify problem areas and solutions

- Describe & map your site
- Identify high & low salt use areas
- Identify problem areas
- Develop action plans

### **Resources on Website**

- Site Designation Guide
- Resource Sheets #9-11
- Self Assessment Worksheet
- Application Form

Site owners with multiple facilities should complete an implementation plan to indicate how all sites will be brought into the program. An individual assessment will be required for each site.

Contractors should work with clients to complete this section. When working with clients participating in the **smart about salt** program, contractors should ask to see related documents.

## Self-Assessment - Site

Site Description		<b>Instructions for Self-Assessment – Site</b>  1. Map your site 2. Identify problem areas and solutions 3. Identify low use areas and strategies
Site name or ID #:		
Site Address: <small>(physical address including lot or street # and nearby major intersection)</small>		
Site Description: <small>(include the size of the traffic areas (ha. or m<sup>2</sup>) and pedestrian areas (length or area), and any significant features)</small>		
Problem Areas (see Resource Sheets #10 and 11)		
Area # on Map		Brief Description of Problem
Solution		Action Plan
